Full-Stack Web Development Bootcamp

George Washington University (EdX)

Full-Stack Web Developer

(May 2023 – Oct 2023)

Projects

Event Scheduler "uFree"

github.com/hafsah1976/uFree

Link: ufree-f24a66c626ea.herokuapp.com

- A robust event scheduler with a focus on matching participant time availability. · Responsible for much of the frontend visuals and client-to-server functionalities. Assisted in laying the foundations for maintenance on client-side logic.
- React, GraphQL, ApolloServer, MongoDB

Character Creator

github.com/Z-Alfadl/Character-Creator

Link: character-creatormator-b75c37ca8524.herokuapp.com

- A fun character creator where users can create and share characters for literature, tabletop roleplaying games, and other recreational activities.
- Focused on writing and maintaining the middleware responsible for the applications requests and retrieval from a MySQL-ran database.
- Express, MySQL, Sequelize
- News Article Search Engine

News Article Search Engine

github.com/rhonvyramos/libel_news_reports

Link: rhonvyramos.github.io/libel_news_reports

- A simple news article search engine that uses publicly available news article APIs. Emphasizes user agency in writing their own notes about an article that would be saved on the browser itself.
- Implemented Inquirer and HTML forms as part of the search engine function for this application. Utilizing Inquirer, JavaScript, REST API, LocalStorage
